FOOD CONTACT STATEMENT

AIRFLOW™ VENTED POLYETHYLENE STRETCH FILM

In reference to your request concerning the use of Airflow™ Vented Polyethylene Stretch Film for non-food contact applications in a registered food environment and in this case for containment of your products onto a pallet for the purpose of palletization/unitization within your logistics supply chain.

Given the fact that the above-mentioned Airflow™ vented film is used for non-food contact applications (to palletize or unitize loads of prepackaged foods) - Airflow™ Vented Polyethylene Stretch Film is exempt from the CFIA evaluation program.

Airflow™ film and other polyethylene stretch films supplied by WP Innova are not intended nor approved for direct food contact. As a result, WP Innova is not able to supply the following commonly requested documents:

1. Bio-terrorism Act of 2002 policies and procedures
2. Letter of Guarantee as outlined in Title 21 of the Federal Food, Drug, and Cosmetic Act
3. Third party audit results
4. GMP policies and procedures
5. HACCP Certification

Although our facilities are not inspected or approved to produce food grade films, it should be noted that the materials used to produce our clear and colorless films are approved under FDA 21 CFR177.1520 direct food contact regulations, and these films are considered safe for use as a secondary or tertiary packaging component.
